Preparedness

MRO's Emergency Response Team continues to closely monitor the COVID-19 pandemic and is making decisions based on the health and safety of MRO staff, stakeholders, and others involved in our daily activities. All efforts are being coordinated with the ERO Enterprise, industry partners, and state and provincial governments, as necessary.

Mitigation and Response

We are following WHO and CDC guidelines. MRO employees are working from home, unless critical business needs require them to be in the office, and all employee travel has been restricted and visitor access to MRO's office is closed through **May 29, 2020**.

All MRO in-person industry meetings will be held virtually or postponed or canceled through the Labor Day holiday.

Our website calendar will be updated to reflect this change as decisions on each meeting are made. Any questions concerning meetings or registration should be sent to meetings@mro.net.

MRO has extended the deadline for the Q2 2020 Self-Certification for CIP-011-2 and TOP-001-4 from June 30, 2020, until September 30, 2020. MRO is also suspending the issuance of the Q3 2020 Self-Certifications for CIP-004-6 and TPL-001-4. Please see the revised schedule on [MRO's website](#).

A new Security Advisory Council Threat Forum call has been initiated to address challenges and share lessons learned related to the COVID-19 pandemic. Join the call by completing a [registration](#) form or contacting estee.kolles@mro.net.

Please visit our [website Newsroom](#) for other important industry COVID-19 response efforts.
